

Linux Commands

Quick reference for SOC Analyst & Linux administration
root@day12:~\$ _

1 pwd

Print Working Directory — displays the current directory.

```
Syntax: pwd
Example
$ pwd → /home/hamida
```

2 ls

List — displays files and folders.

```
Syntax: ls
ls -l → detailed info
ls -a → hidden files
ls -lh → readable sizes
```

3 cd

Change Directory — moves between directories.

```
Syntax: cd folder_name
cd Documents · cd ..
cd ~ (home) · cd / (root)
```

4 mkdir

Make Directory — creates a new folder.

```
Syntax: mkdir folder_name
mkdir SOC
mkdir Logs Reports Evidence
```

5 rmdir

Removes an empty folder.

```
Syntax: rmdir folder_name
Example
rmdir Test
```

6 touch

Creates an empty file.

```
Syntax: touch filename
touch notes.txt
touch file1.txt file2.txt
```

7 cp

Copy — copies files or folders.

```
Syntax: cp source destination
cp notes.txt backup.txt
cp -r Folder BackupFolder
```

8 mv

Move — moves or renames files.

```
Syntax: mv old new
mv notes.txt report.txt
mv report.txt Documents/
```

9 rm

Remove — deletes files. ⚠ rm -rf is permanent.

```
Syntax: rm filename
rm report.txt · rm -r Folder
rm -rf Folder
```

10 cat

Concatenate — displays file contents.

```
Syntax: cat filename
cat notes.txt
cat > notes.txt (exit Ctrl+D)
```

11 nano

A simple text editor.

```
Syntax: nano filename
Save: Ctrl+O
Exit: Ctrl+X
```

12 chmod

Changes file permissions.

```
Syntax: chmod permission filename
chmod 755 script.sh
chmod 644 notes.txt
```

13 chown

Change Owner — changes file owner.

```
Syntax: sudo chown user filename
sudo chown hamida notes.txt
sudo chown hamida:developers notes.txt
```

14 find

Searches for files and folders.

```
Syntax: find location -name filename
find /home -name notes.txt
find . -name "*.txt"
```

15 grep

Searches for text inside files.

```
Syntax: grep "word" filename
grep -i error logs.txt
grep -n error logs.txt
```

Useful Commands

clear

Clears the terminal.

```
clear
```

history

Shows command history.

```
history
```

whoami

Shows current user.

```
whoami
```

man

Shows the manual page.

```
man ls
```

echo

Prints text / saves to file.

```
echo "SOC Analyst" > notes.txt
```

Number	Permission
7	Read + Write + Execute
6	Read + Write
5	Read + Execute
4	Read Only
0	No Permission

⚠ **Warning: rm -rf permanently deletes files and folders without confirmation. Use it carefully.**
